EDUCATION

University of California, Berkeley

B.A., Cognitive Science
Minor in Computer Science

SKILLS

Programming

- HTML & CSS
- JavaScript
 - React
 - React Native
 - Vue
 - Node.js
 - jQuery
- TypeScript
- Ruby
- Java
- Python
- PostgreSQL
- REST APIs
- Git
- Github

Design

- Figma
- Webflow
- Adobe Illustrator
- Adobe Photoshop
- Wireframing
- Prototyping
- Canva
- 2D Illustration
- 2D Animation

EXPERIENCE

Frontend Developer & Designer

Blissy | Mar 2021 - Oct 2023

- Designed, developed and maintained e-commerce systems across web, mobile and email platforms.
- Utilized Shopify Scripts, Liquid, and CSS to implement dynamic widgets on product, cart and checkout pages.
- Implemented SEO strategies which doubled web traffic to 1M visits/month and reduced bounce rate by 21%.
- Integrated third-party apps in Shopify, contributing to driving upsells, cross-sells, and increasing AOV.
- Collaborated with CRO teams to implement A/B testing on key landing pages, improving conversions up to 7.5%.
- Ensured screen responsiveness, web accessibility standards, and compatibility across devices & browsers.

Full-Stack Software Engineer Intern

Marqui Labs | Oct 2020 - Feb 2021

- Rebuilt NASA Aeronautics Research Institute (NARI)'s website from scratch using Vue and Nuxt.js to provide increased performance, scalability, and security.
- Built a custom REST API database integrated via Node.js.
- Transformed database interface from a static table data structure to dynamic search with filtering and keyword search functionality to improve user experience.

Web Design Intern

CDA inZaLab | Nov 2020 - Feb 2021

- Designed a 27-page interactive prototype for both mobile and desktop views using Figma and Adobe Photoshop.
- Created style guide, branding, press kits, and letterheads.

PROJECTS

Cubbi - Household Management Mobile App

React Native, TypeScript, PostgreSQL | Ongoing Solo Project

- Engineered full onboarding flow with secure authentication, enabling users to create accounts, customize profiles, and join or start household groups.
- Structured a scalable backend with PostgreSQL, implementing row-level security and seeding test data for streamlined development and testing.
- Built a task management feature for adding and assigning shared chores. Other MVP features underway.
